Experience (continued)

SERVICE DESIGNER

Optus, Sydney

June 2019

Creating a Signature Experience for customers.

Client project undertaken during Academy Xi program.

To better understand the needs, behaviours and dynamics of a specific customer segment, insights were developed using qualitative research to guide the exploration of creating a 'Signature Experience' going beyond the current product and service offerings for new and existing customers. Of the ten concepts addressing various pain points, three were brought to prototyping and focus group testing.

Our research findings and insights have been taken to Optus' internal experience team to support their existing exploration into the space.

Key responsibilities

- Qualitative research and analysis
- Desktop research exploring consumer, government and trend reports
- Conduct parent and child user interviews
- Competitor analysis
- Affinity mapping and synthesis
- Focus group facilitation and testing
- Customer Journey Map identifying pain points and opportunities
- Ideation
- Low and high fidelity prototype development
- Usability testing

UX DESIGNER

Alfie, Sydney

June 2019

Review hotelier and customer concierge products.

Client Project undertaken during Academy Xi program.

Alfie is a game-changing mobile Digital Butler for hotels/resorts, and their guests, designed to work in synergy with hotel/resort teams to deliver better service, improved reviews and increasing hotel revenue.

To understand slow adoption rates for both hotelier and concierge customer-facing products, qualitative and quantitative research was conducted to build insight into hotel business operations and the before-during-after travel behaviours of guests, with the hope to identify opportunities to increase customer usage and retention.

We supplied the Meet Alfie team with a complete redesign of their hotelier platform, creating an easier-to-use dashboard and a new direction for the consumer app, creating an ecosystem with more value to the hotel stayer.

Key responsibilities

- Qualitative research and analysis
- Desktop research
- User interviews
- Competitor analysis
- Affinity mapping and synthesis
- Customer Journey Map identifying pain points and opportunities
- Co-design workshop facilitation
- Low fidelity prototype development

Experience (continued)

SERVICE DESIGNER

WipeHero, Sydney

May 2019

Review service delivery for a mobile vehicle cleaning company.

Client Project undertaken during Academy Xi program.

Founded and based in Sydney, WipeHero brings the carwash to you, wherever you are, using their very own developed waterless technology - From privately owned vehicles to fleets, homeowner to business, it's the new and convenient way to get your car washed.

To understand slow adoption and low retention rates, qualitative and quantitative research was conducted to better understand the behaviours of car owners and the process in which their vehicle was cleaned. We also conducted contextual inquiries to observe how the service was perceived and how business operations and communication were conducted internally.

Of the ten concepts addressing various issues, three were developed into 'theatrical' prototypes with various supporting artifacts. One opportunity we identified was that the onsite staff cleaning the vehicles was a heavily undervalued opportunity for lead generation and insight about the service offering to passers-by. The prototype leveraged the WipeHero uniform, cleaning kit and introduced flags and large branded vehicle towels to create a stronger peripheral presence.

Key responsibilities

- Qualitative and quantitative research and analysis
- Desktop research
- Online survey
- Service safari
- User interviews
- Affinity mapping and synthesis
- Customer Journey Map identifying pain points and opportunities
- Ideation
- Low fidelity prototype development

SERVICE DESIGNER (SECONDMENT)

Blacktown City Council, Sydney

April 2018 - November 2018

Review service delivery for an internal business unit.

This role was in addition to my day to day role as a Graphic Designer.

Blacktown City is the second-largest in New South Wales and the fourth largest in Australia. They employ some 1,350 staff, have assets of over \$3.1B and an annual budget of over \$600m. The City has 48 suburbs over an area of 247 sq km, and a population of over 350,000.

The BPR team (better practice review) are the drivers of an organisation-wide program to review the public service offerings and operations of internal business units to assess, develop and assist in the implementation of best practice. To better understand the business unit, qualitative, quantitative, contextual inquiry, deep financial analysis, current-state service and stakeholder mapping is conducted.

Key responsibilities

- Qualitative research and analysis
- Desktop research
- User interviews
- Competitor/industry analysis
- Business/team process map identifying pain points and opportunities
- Customer Journey Mapping
- Service Mapping
